CUS 1172 – Web Application Development
Assignment Submission Cover page

Student Name: Siddeeq Rasheed
Assignment: Assignment 01- Milestone 02

Work Description

- This assignment was about adding CSS styling to our html page that we made in the first milestone.
- I completed the following requirements:
    - My submission fulfills all the requirements of milestone one.
    - All sections in my profile page are styled using CSS.
    - At least one element (first h1 on the page) was styled using the in-lined "style" attribute of an HTML tag.
    - At least one styling element (anchor tags) was styled using the <style></style> tag within the HTML page.
    - All other CSS styling is contained in separate files that are linked to my html page. (css/profileStyle.css and css/profileStyleMobile.css)
    - My CSS files use class-selectors, id-selectors, and tag-selectors.
    - I provided styling for each of the elements in my page.
    - My page must employ responsive design to handle media-types with two different screen sizes. (The page has regular styling for desktop screens, while the menu, images, table, and form adapt for screen sizes less than 1000 pixels)
    - My page employs responsive design for print media type viewing. (The menu and video will not appear when printing)
    - I used at least one CSS feature that was not covered in class. (text-shadow)
    - I believe my responsive CSS designs are well designed and visually appealing.
    - My page and CSS files are hosted on github-pages and be accessible through the web.
    - Files are organized in folders and subfolders.
